About the GW4 Alliance

Founded in 2013, GW4 is an alliance of four of the most research-intensive and innovative universities in the UK: Bath, Bristol, Cardiff and Exeter.

Collaboration is at the heart of everything we do and it makes us greater together than the sum of our parts. We work with other universities, businesses and civic bodies, acting as the anchor institutions to support a knowledge-intensive economy.

Our Value

➢ We add value by creating research and innovation that address some of the biggest challenges and priorities facing society. Our activities inform policy and attract investment to support regional economic growth, respond to skills needs, and raise the national and international profile of our universities.

➢ The GW4 universities contribute substantially to the global knowledge economy with a combined annual research income of over £465 million and a £2.4 billion annual turnover.

➢ Our universities employ over 13,000 academic staff and educate over 33,000 postgraduate and 82,000 undergraduate students.

Our Impact and Scale

GW4 universities have worked together with more than 400 business and non-academic partners to deliver world-class research and innovation.

Our 125 GW4-funded research communities have generated over £87 million in external research income. A return on investment of 25:1, for every £1 invested by GW4.

We are the only research alliance to collaborate across England and a devolved nation.
Our Strategic Priorities

GW4 interventions do not just focus on our areas of collective strength, but also consider how, together, we can best address major national and international policy and strategic priorities. Our shared research missions will add value in:

- Tackling global challenges through advanced cyber and digital
- Effective routes to accelerate the transition to sustainable Net Zero
- Capitalising on creative communities to foster sociocultural growth
- Advancing health and wellbeing research and innovation for all.

Work with us

As the University Alliance representing your constituency’s university, we are proud to work with local and national stakeholders to provide co-created solutions and increase our impact.

GW4 would be happy to work with you in the following ways:

- **Support our campaign:** GW4 is campaigning to improve accessibility of further education by extending the current undergraduate Childcare Grant to include postgraduate students. You can find out more about our campaign on our website.

- **Informing policy through collaborative research:** GW4 funds and supports collaborative research and innovation that provides insights that can help inform and shape policy. Contact us to find out more about how we can connect academics and policymakers.

- **Sign up to the GW4 Newsletter.**

GW4 Case Study:
Beyond Net Zero - Liveable Homes

A research project led jointly by Cardiff University and the University of Bath will work with communities in Bristol and Swansea to co-design energy efficient and low carbon housing fit for the future, thanks to a £4.6 million award from the Arts and Humanities Research Council (AHRC).

With the support of GW4, in 2023, a research project led jointly by researchers from Cardiff University and the University of Bath secured £4.6 million in funding from the Arts and Humanities Research Council (AHRC) to develop energy efficient and low carbon housing.

As part of the project, researchers will work with industry, community groups and local authorities to transform existing housing into ‘Beyond Net Zero’ liveable homes, as part of UK Research and Innovation’s (UKRI) Green Transition Ecosystem.

The team will design, test, implement and monitor innovative prototype bio-based lower carbon solutions to improve the energy efficiency and resilience of housing.

The project’s goal is to create scalable and transferable designs and solutions to retrofit a greater number of houses and different house types.

The project aims to deliver a green transformation, fostering a legacy of positive behaviour change, supporting local and regional supply chains, and strengthening local delivery capacities.

Find out more about the Beyond Net Zero Liveable Homes project on the GW4 website
